Skills Summary

- **Languages**:   HTML, CSS, JavaScript, TypeScript, Python, Java, SQL
- **Frameworks**: ReactJS, NextJS, NodeJS, Express, Prisma, TailwindCSS, Refine, Nestjs
- **Tools**:   Docker, GIT, Kubernetes, N8n, PostgreSQL, MySQL, Firebase, Mongodb, Postman
- **Platforms**:   Linux, Web, Windows, AWS
- **Soft Skills**:   Team Manager, Effective Communicator, Fast-Learner/Adapter

Experience

Full Stack Developer Intern | Optacloud | Dec 2024 – Mar 2025   Remote

- Contributed to the **Track** team management project, integrating **Stripe** for subscriptions, developing an **N8N automation tool** to streamline workflows, and using the **Probot framework** to build **GitHub App** that interact with GitHub REST APIs. Improved the frontend with **Material-UI** and **Tailwind CSS** for a modern, responsive design.
- Contributed on the Edobo Medical project, an e-commerce medical website, utilizing **Next.js** for the frontend and Express.js for the backend to deliver a seamless user experience.

Upwork FullStack Freelancer | Apr 2024 – Jul 2024   Remote

- Developed an admin UI venture investment platform similar to AngelList.
- Utilized Refine framework, Shadcn UI library, Tailwind CSS, Next.js 14, Prisma, and PostgreSQL to deliver a seamless and efficient user experience.
- Migrated the React website to Next.js for server-side rendering and etc., resulting in enhanced **SEO** and Faster Load times.

  My Upwork Profile: *https://www.upwork.com/freelancers/~01d115af77c882734f*

Hackathon Participant & Winner | Devpost, Dorahacks, Encode   Remote

- Secured 1st Place in 2 on-campus hackathons/Events
- Won 5 awards from 10+ online hackathons on platforms like Devpost, Dorahacks, and Encode.
- Built full-stack applications using React.js, Next.js 14, Prisma, IPFS, PostgreSQL, Express, and Tailwind CSS For the following hackathons/events.
- Collaborated in diverse teams, solving real-world problems under tight deadlines.

SQL Database Developer Intern | IPEC Solutions | June 2023 – Aug 2023   Onsite

- Led a team of 5 interns in designing and developing a Database Management System (DBMS) for doctors using SQL and Python.
- Developed the front-end of the application using React.js, enabling an intuitive user interface for managing patient records..
- Gained hands-on experience in full-stack development, database design, and cross-functional team leadership.

Projects

- **Codehive – A Web3 Coding Platform**

  Built using ReactJs for the frontend, PostgreSQL to store coding challenges, Prisma for streamlined database development with an escrow smart contract to manage funds and used tron tools like tronQL, tronLink,TronWeb

- **Berwoons – Social Media Marketing Agency Website**

  Developed a digital marketing platform using React.js for the frontend, MongoDB to manage client requests and data, and styled with Tailwind CSS and Shadcn for a modern, responsive UI.

- **Cedium – Blogging Website**

Created a blogging website using Next.js 14, Tailwind CSS, and PostgreSQL, optimized for SEO and fast load times with server-side rendering and static site generation.
